Your Calorie Results

BMR (Base Metabolic Rate) 1.62K

TDEE (Total Daily Energy Expenditure) 1.95K

Maintenance Calories (≈ TDEE) 1.95K

Mild Weight Loss Calories (TDEE – 10%) 1.75K

Weight Loss Calories (TDEE – 15%) 1.65K

Extreme Weight Loss Calories (TDEE – 30%) 1.36K

Very Extreme Weight Loss (TDEE – 40%) 1.17K

Calorie Calculaor

Male

Female

The calorie calculator helps you estimate your daily energy needs by combining your Basal Metabolic Rate (BMR) with your activity level. By entering your age, height, weight, and gender, the calculator determines your BMR—the calories your body burns at rest. Then, based on your lifestyle or exercise routine, it applies an activity factor to calculate your Total Daily Energy Expenditure (TDEE). This gives you a personalized estimate of how many calories you need each day to maintain, lose, or gain weight.

Activity Type

Sedentary: little or no exercise
